the insights offered in this book are intended to guarantee the reader a more successful

career it is written especially for managers and executives whose jobs require managing people successfully but it is also written for anyone who must make decisions that involve other people the authors discuss the decision styles and habits that people form and how to change decision making habits where necessary the models and techniques for decision making presented here have been used throughout the world in all kinds of businesses and government agencies decision style concepts can benefit anyone from a new management trainee or mba student to the ceo of a large firm

building on lecture notes from his acclaimed course at stanford university james march provides a brilliant introduction to decision making a central human activity fundamental to individual group organizational and societal life march draws on research from all the disciplines of social and behavioral science to show decision making in its broadest context by emphasizing how decisions are actually made as opposed to how they should be made he enables those involved in the process to understand it both as observers and as participants march sheds new light on the decision making process by delineating four deep issues that persistently divide students of decision making are decisions based on rational choices involving preferences and expected consequences or on rules that are appropriate to the identity of the decision maker and the situation is decision making a consistent clear process or one characterized by ambiguity and inconsistency is decision making significant primarily for its outcomes or for the individual and social meanings it creates and sustains and finally are the outcomes of decision processes attributable solely to the actions of individuals or to the combined influence of interacting individuals organizations and societies march s observations on how intelligence is or is not achieved through decision making and possibilities for enhancing decision intelligence are also provided march explains key concepts of vital importance to students of decision making and decision makers such as limited rationality history dependent rules and ambiguity and weaves these ideas into a full depiction of decision making he includes a discussion of the modern aspects of several classic issues underlying these concepts such as the relation between reason and ignorance intentionality and fate and meaning and interpretation this valuable textbook by one of the seminal figures in the history of organizational decision making will be required reading for a new generation of scholars managers and other decision makers

provides a process and framework for using historical knowledge in intelligent decision making and presents several situations in which world leaders did and did not do this

are you lacking confidence in your decision making abilities leaders often have to make challenging decisions such as how do we improve employee morale how do we decrease employee turnover what needs to happen to ensure employees and stakeholders feel safe to return to work during a pandemic great leaders understand how to balance emotion with reason and to make decisions that positively impact their organizations making good decisions in difficult situations is no small feat change uncertainty stress and anxiety all contribute to this dilemma the practical decision maker a handbook for decision making and problem solving 2nd edition will help you achieve a high level of confidence and give you practical tools to make faster and more effective practical decisions decision making has never been more critical especially for today s leaders updates to this new edition include additions to reflect 21st century technology and the divisive times leaders are in today

are you lacking confidence in your decision making abilities leaders often have to make challenging decisions such as how do we improve employee morale how do we decrease employee turnover what needs to happen to ensure employees and stakeholders feel safe to return to work during a pandemic great leaders understand how to balance emotion with reason and to make decisions that positively impact their organizations making good decisions in difficult situations is no small feat change uncertainty stress and anxiety all contribute to this dilemma the practical decision maker a handbook for decision making and problem solving 2nd edition will help you achieve a high level of confidence and give you practical tools to make faster and more effective practical decisions decision making has never been more critical especially for today s leaders updates to this new edition include additions to reflect 21st century technology and the divisive times leaders are in today

today s world is complex and getting more so each day huge multinational corporations international crisis and fast breaking events require most people to make decisions on a daily basis without the tools to understand the long term impact that today s decision

might create because most people have never really been trained in how to make important complex decisions most people rely on experience and gut reaction which is okay for many decisions but not okay for decision that will have meaningful impact on organizations and individual decision makers need to develop the art and science of strategic decision making here professor thomas martin explains the need for decision makers to modify their thinking about how they deal with acquiring and analyzing information in each of the decision making process steps this approach requiring thinking modification will lengthen the process make it more complex and to some more arduous but the comprehensiveness of the new thinking approach should lead to improved and more effective decision making in this book dr martin presents a thinking modification framework that asserts that in the decision making process there are three situational states a current state future state and a transitional state that one must deliberate in finding a solution for each of these situational states martin develops an identical five step process to determine the best decision to make the steps of this process include change needing situational analysis challenge framing causal analysis generating solution ideas choosing a solution set implementation and aftermath planning this book will appeal to decision makers leaders and students of management who want a specific framework that details the process behind making strategic well informed decisions

executives in business industry government can find out how to fine tune the decision making process by using the highly acclaimed multicriteria decision making method of the analytic hierarchy process ahp put your decision making on a basis of logic consistency the ahp technique helps you organize your thought processes in a logical fashion set priorities this method is particularly applicable to decision making involving complex ill or non structured problems with both tangible intangible factors you can predict likely outcomes select the best alternatives allocate resources according to priorities conduct cost benefit comparisons plan projected or desired futures exercise control over changes in the decision making system this is a book of case studies practical examples with an introduction to the theory it can serve as a useful textbook in a decision making course in a graduate school of business

have you ever experienced a decision situation that was hard to come to grips with did

you ever feel a need to improve your decision making skills is this something where you feel that you have not learned enough practical and useful methods in that case you are not alone even though decision making is both considered and actually is a very important skill in modern work life as well as in private life these skills are not to any reasonable extent taught in schools at any level no wonder many people do indeed feel the need to improve but have a hard time finding out how this book is an attempt to remedy this shortcoming of our educational systems and possibly also of our common partly intuition based decision culture intuition is not at all bad quite the contrary but it has to co exist with rationality we will show you how methods for decision making should be of prime concern to any individual or organisation even if the decision processes are not always explicitly or even consciously formulated all kinds of organisations as well as individuals must continuously make decisions of the most varied nature in order to prosper and attain their objectives a large part of the time spent in any organisation not least at management levels is spent gathering processing and compiling information for the purpose of making decisions supported by that information the same interest has hitherto not been shown for individual decision making even though large gains would also be obtained at a personal level if important personal decisions were better deliberated this book aims at changing that and thus attends to both categories of decision makers this book will take you through a journey starting with some history of decision making and analysis and then go through easy to learn ways of structuring decision information and methods for analysing the decision situations beginning with simple decision situations and then moving on to progressively harder ones but never losing sight of the overarching goal that the reader should be able to follow the progression and being able to carry out similar decision analyses in real life situations the open access version of this book available at taylorfrancis.com has been made available under a creative commons attribution non commercial no derivatives 4.0 license

health care systems are complex and as a result it is often unclear what the effects of changes in policy or service provision might be at the same time resources for health care tend to be in short supply which means that public health practitioners have to make difficult decisions this book describes the quantitative and qualitative methods that can help decision makers to structure and clarify difficult problems and to explore the

implications of pursuing different options the accompanying cd rom provides the opportunity to try out some of the proposed solutions the book examines models and decision making in health care methods for clarifying complex decisions models for service planning and resource allocation modelling for evaluating changes in systems series editors rosalind plowman and nicki thorogood

whether you are the ceo of a major firm an owner or manager of a small business a sole proprietor or someone dealing with personal family decisions the focussed approach described in this book will make you a better decision maker small business owners make decisions on contracts vendors and general operations financial services professionals such as realtors insurance agents and financial planners help clients make decisions franchisees make personnel equipment and financial decisions parents make decisions about schools family finances home and car purchases etc investors make decisions about buying selling and managing cash flow and tax implications let s face it decision making is at the heart of virtually everything we do in all cases we have to deal with values alternatives and uncertainty are you ready to become a more focussed decision maker

given the many advances in technology as well as the ongoing discussion of health care reform post affordable care act today s healthcare administrators require a strong foundation in practice based ethics to confront the challenges of the current healthcare landscape ethics in health administration fourth edition focuses on the application of ethics to the critical issues faced by today s healthcare administrators after establishing a foundation in the theory and principles of ethics the text encourages students to apply ethics to such areas change regulation technology and fiscal responsibility thoroughly updated the fourth edition includes 12 new contemporary case studies that encourage students to apply ethics a new chapter on the ethics in the epoch of change stresses major changes in healthcare including the digital revolution population health ethics temptations and ethic resilience other chapters have been revised to include new cases and more

making a decision of any importance is never simple on the one hand specialists in decision theory do not come within the reach of most policy makers and secondly there

are very few books on pragmatic decision that are not purely anecdotal in addition there is virtually no book that provides a link between decision making and action this book provides a bridge between the latest results in artificial intelligence neurobiology psychology and decision making for action what is the role of intuition or emotion what are the main psychological biases of which we must be wary how can we avoid being manipulated what is the proper use of planning how can we remain rational even if one is not an expert in probabilities perhaps more importantly for managers how does one go from decision to action so many questions fundamental to the practice of decision making are addressed this book dissects all issues that arise almost daily for decision makers at least for major decisions drawing on numerous examples this book answers in plain language and imagery all your questions the final chapter takes the form of a brief reminder everything you have to remember to be a good decision maker

this issue aims to portray justify advance contrast and illustrate research programs in the domain of cognitive decision making under risk and uncertainty where such research programs are intended to promote theories models or conceptual frameworks for prediction of empirical observations descriptions of empirical results likely or rationalized to lead to predictions e g models with free parameters whose values are part of a hypothesis to be tested or cross validation of descriptive model results generalizations of many specific empirical results normative models alternative to expected utility theory eut replications of published results concerning any of the above any of the above may concern any aspect statistic of empirical data including individual or group behavior itself e g prediction of people s actual choices differences or difference in rankings of individual or group behavior distribution of responses for the general purpose of promoting scientific understanding of individual or collective human behavior in the domain of decision making under risk or uncertainty in particular this issue may shed light on the controversy between behavioral economics and cognitive economics the first relates to kahneman and tversky s program of heuristics and biases and the normative model of formal rationality whereas the second is connected to simon gigerenzer and vialle s program of simple adaptive heuristics and the normative model of ecological bounded rationality both of which aim to improve economics on a cognitive basis
